

## Research Purpose

To determine the effectiveness of peer education programmes in fostering gender equality and raising awareness about gender-related issues among students in the region.

## The sample

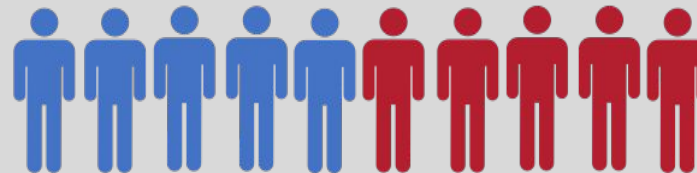

The population comprised students (100), teachers (50), and peer educators in secondary schools (20) where gender awareness programmes were being carried out.

## Result 1:

Peer education programmes greatly increased students' knowledge on gender issues, awareness about gender-based violence, and challenge negative stereotypes.

## Methodology

- The Peer Education and Gender Awareness Questionnaire (PEGAQ) was used to collect data on gender awareness and the effectiveness of peer education programmes in secondary schools.
- Hypotheses were tested using Analysis of Variance (ANOVA) to determine significant differences in gender awareness levels across different groups.

## Result 2:

Peer education has improved students' understanding of gender equality.
